PROFILE

First Class Computer Science (Artificial Intelligence) graduate seeking an entry-level Data Analyst role. Strong SQL and Python foundations built through CRISP-DM coursework, a UC Davis SQL for Data Science certificate and the Google Data Analytics certificate (in progress), with hands-on experience at Apple turning complex technical detail into clear, accessible insight for non-technical audiences.

ACADEMIC DETAILS

Qualification	Institute	Year	Result
BSc (Hons) Computer Science (Artificial Intelligence)	Nottingham Trent University	2026	First Class (1st)

Relevant coursework: Data Analytics Techniques & Programming (Python, pandas, NumPy; CRISP-DM; classification, regression, clustering, ensemble methods; model evaluation & tuning); Information & Database Engineering (SQL, normalisation, query design); Distributed Database Engineering (Hadoop, MapReduce, HDFS, MongoDB, Cassandra).

TECHNICAL SKILLS

SQL & Databases	PostgreSQL, MySQL, MongoDB; joins, aggregations, normalisation, query design
Python (Data)	pandas, NumPy, scikit-learn, matplotlib
Analytics & Stats	Descriptive and inferential statistics, hypothesis testing; regression, classification, clustering via CRISP-DM
Visualisation & Tools	Tableau; Excel & Google Sheets (pivot tables, lookups, charts); Git; Agile / Scrum
Big Data	Hadoop, HDFS, MapReduce (basics)
Data Governance	UK GDPR and Data Protection Act 2018

KEY PROJECTS

CRISP-DM Data Analytics Pipelines Sep 2024 - Apr 2025

Python · pandas · NumPy · scikit-learn · matplotlib

- Worked the full data-analytics workflow on real datasets: framing the question, cleaning and exploring the data, applying regression, classification and clustering, validating findings, and visualising the patterns and feature importance that mattered for a non-technical reader.

Big Data Analysis of UK Road Safety Records Sep 2025 - Feb 2026

Java · Hadoop · HDFS · MapReduce · Linux

- Analysed the UK Department for Transport road-safety dataset on a 3-node Hadoop cluster, using Java MapReduce to compute casualty-severity distributions and validating aggregate counts before drawing conclusions, working hands-on with data volumes too large for a single machine.

Final Year Project - Database Design for a Bidding Platform Oct 2025 - Apr 2026

PostgreSQL · Normalisation · ERDs · Role-Based Access Control

- Designed a fully normalised PostgreSQL schema (ERDs for users, jobs and bids) with parameterised SQL, joins, indexing and role-based access control, built to comply with UK GDPR and the Data Protection Act 2018.

WORK EXPERIENCE

Apple Inc. - Technical Specialist Jul 2025 - Present

Leicester Highcross

- Translate complex technical detail into clear explanations for non-technical customers and diagnose faults under time pressure using structured fault-finding, communication and analytical problem-framing that transfer directly to presenting findings to business stakeholders.
- Recognised by management as a go-to person for customers with difficult technical issues; awarded Blue Orchid status across customer satisfaction, productivity and collaboration; ranked 2nd in the team for business introductions.

CERTIFICATIONS

- [SQL for Data Science](#) - UC Davis (Coursera, May 2026)
- [Fundamentals of Visualization with Tableau](#) - UC Davis (Coursera, Jun 2026)
- [Excel Fundamentals for Data Analysis](#) - Macquarie University (Coursera, Jun 2026)
- [Quantium Software Engineering Job Simulation](#) - Forage (Jun 2026)
- [Google Data Analytics Professional Certificate](#) - Coursera (in progress)

POSITIONS OF RESPONSIBILITY & EXTRACURRICULAR

- Student Mentor, Nottingham Trent University (Jun 2023 - May 2026): mentored domestic and international peers' alongside full-time study.
- State-level Badminton Champion, India.
- Interests: UK energy transition, fintech and data tooling; gym training.
